

PLUG GROUP LIMITED (IN LIQUIDATION)

BUSINESS OVERVIEW

Gordon Brothers presents an opportunity to acquire the assets of Plug Group Limited (in Liquidation), a UK-incorporated infrastructure transformation company specialising in copper cable extraction services.

Plug operates an asset light model, deploying licensed cable extraction technologies that enable the recovery of large-pair, high-value copper cables without trenching, overcoming a major industry constraint that has historically left significant copper assets stranded underground.

The Company's Brazilian subsidiary has successfully completed a commercial pilot with a notable Brazilian telecoms provider and secured approved supplier status. The technology which the Brazilian subsidiary has utilised to undertake the work is not owned and it is currently out of license.

This opportunity may be of interest to infrastructure investors, strategic telecom service providers, utilities contractors, metals & recycling groups, and industrial technology acquirers seeking exposure to an environmentally sustainable recovery model.

OPPORTUNITY HIGHLIGHTS

- **Proven Commercial Validation:** Successful pilot conducted and preferred supplier approval with notable Brazilian telecoms provider.
- **Brazil Market Access:** Over 1 million tonnes of decommissioned copper estimated in Brazil.
- **Rising Copper Demand:** Opportunity to capitalise upon increased demand for copper due to global supply issues and AI data centres.

ASSETS AVAILABLE

- Shares in Brazilian subsidiary, which has previously undertaken some contract work for a Brazilian telecoms provider.

DEADLINE

A deadline for offers has been set for **Friday 5th June 2026 at 5:00pm (BST)**.

FURTHER INFORMATION

Requests for further information should be addressed to Emily Muir of Gordon Brothers.

Access to additional information can be provided upon receipt of a signed NDA. All offers are to be supported by proof of funding.
