

PNEUMOWAVE LIMITED (IN LIQUIDATION)

BUSINESS OVERVIEW

Gordon Brothers presents an opportunity to acquire the assets of Pneumowave Limited, a pioneering medical technology company specialising in remote respiratory monitoring and digital therapeutics.

The company has developed an advanced, end-to-end platform designed to prevent deaths from respiratory failure. By combining high-resolution wearable sensors with sophisticated AI and proprietary algorithms, the technology provides real-time detection of life-threatening respiratory events including opioid-induced respiratory depression, asthma attacks, and COPD exacerbations.

To date, the technology has received circa £8m of investment, and the company has conducted eight clinical studies, generating over 40,000 hours of biosensor data.

An acquisition would ideally suited for medical device manufacturers, pharmaceutical companies, or global digital health providers looking to finalise development of the solution ahead of commercialisation.

OPPORTUNITY HIGHLIGHTS

- **Pioneering Respiratory AI Engine:** Proprietary software platform and library of algorithms designed to detect and alert for physiological instability in real-time.
- **Wearable Integration:** Developed to capture medical-grade physiological data through non-invasive wearable sensors.
- **Clinical Application:** Engineered to address high-risk clinical needs, post-operative monitoring, and chronic respiratory disease management.
- **Data Intelligence:** Built upon a deep foundation of clinical data, enabling high levels of accuracy in predictive alerts and patient diagnostics.

ASSETS AVAILABLE

- Granted Patent & Patent Applications
- Software Code inc. Biosensor-embedded firmware; event detection and data collection applications
- Biosensor Hardware & Equipment
- Organisational Knowledge & Proprietary Data
- Hardware Designs & Software Architecture
- Brand Related Assets

DEADLINE

Interested parties are invited to submit expressions of interest by **Friday 22nd May 2026 at 5:00pm (BST)**.
